

Gardening in August

CAUTION

Wear a hat

Wear sunscreen

Drink plenty of fluids

Planting Schedule

Things to Do

FERTILIZE: Foliar feed all planting beds and lawns with Garrett Juice or (Bio-Form mixed with 1 Tbl. red cedar vinegar per gallon of water) every two weeks.

PRUNE: Trim spent flowers stalks and blossoms from annuals and perennial to stimulate new growth.

WATER: Water your lawn as deeply and as infrequently as possible. Water garden & landscape more often.

Potted plants and hanging baskets daily or as needed.

PEST CONTROL:

Grubworms: Apply beneficial nematodes.

Chinch bugs: Dust natural diatomaceous earth and spray orange oil.

Aphids: Safer soap, or Garrett Juice & Garlic Barrier.

Fire Ants: Broadcast orange or grapefruit peelings or pulp, Beneficial nematodes, or Spinosad.

Chewing insects: Broadcast beneficial nematodes, dust natural diatomaceous earth or spray garrett juice with Garlic barrier add 2 ounces of orange oil per gallon for hard to control insects.

Grasshoppers: Apply diatomaceous earth stirred into the soil. Apply wheatbran, dry molasses and epsom salt mix to soil. Encourage birds.

Cabbage loopers: Spray Bt to vegetables or release trichogramma wasps.
