

# Gardening in June

## **CAUTION**

Where a hat  
Where sunscreen  
Drink plenty of fluids

## Planting Schedule

### Things to Do

**FERTILIZE:** Foliar feed all planting beds and lawns with Ocean Harvest or Neptune Harvest, BioForm Liquid.

(Bio-Form mixed with 1 Tb.. red cider vinegar per gallon of water) every two weeks.

**PRUNE:** Trim spent flowers stalks and blossoms from annuals and perennial to stimulate new growth.

**WATER:** Water your lawn as deeply and as infrequently as possible. Water garden & landscape more often.

Potted plants and hanging baskets daily or as needed.

### PEST CONTROL:

**Grubworms:** Apply beneficial nematodes.

**Chinch bugs:** Spray Neem oil or use the above.

**Aphids:** Safer soap, or Garrett Juice & Garlic Barrier.

**Fire Ants:** Green light Organic Fire Ant control, Citrex, Broadcast orange or grapefruit peelings or pulp, Beneficial nematodes or try horticultural corn meal & Dry molasses.

**Chewing insects:** Broadcast beneficial nematodes, dust natural diatomaceous earth or spray garrett juice with Garlic barrier add 2 ounces of orange oil per gallon for hard to control insects.

**Grasshoppers:** Apply diatomaceous earth stirred into the soil. Apply wheatbran, dry molasses and epsom salt mix to soil. Encourage birds.

**Mosquitoes:** Use SKEETER BEATER a garli barrier and K-Neem recipe. Ask for at Wabash.
